

REBS WIRELADDER REEL

DESCRIPTION

The REBS Wire Ladder Reel is a rugged caving ladder reel with uniquely designed ramps for clean wire ladder deployments. The integrated handle stowage/deployment is ideal for VBSS and other tactical access missions.

The REBS Ladder Reel is used to efficiently operate wire ladders up to 15m (50ft) long. Its functional, strong, flexible and lightweight design makes it perfect for fast operation of wire ladders, but is also beneficial for transportation and storage. The construction softly grips the ladder, can down weight for climbing, and mitigates potential damage to a RHIB pontoon.

CAPABILITIES AND SPECIFICATIONS

PN: WLLR

Brand: REBS

Material Construction: Rubber, Spring Steel

Weight: 6.6 lbs / 3 kg

Deployed Dimensions: 31.0 cm x 17.5 cm x 17.5 cm / 12.2 in x 6.9 in x 6.9 in

Stowed Dimensions: Same

Typical Reach Height: N/A

Capacity: 49 ft / 15 m

Dimensions: Ø 12.2in x H 6.9in / Ø 310mm x H 175mm

RECOMMENDED MISSION PROFILES

VBSS: Surface, Tagline

Dive Operations: Boarding, Ladders, Tagline

Rescue: Maritime

Urban: Hook and Climb, RECCE/SNOT, EOD
