

REBS WINDUP POLE, 15M W/ HANDBRAKE

DESCRIPTION

The REBS Rolatube is a unique composite roll out tube that becomes a rigid pole for placing hooks for climbing and access while remaining packable including deployment subsurface for dive operations and urban multi-story climbing.

The unique composite construction incorporates a memory that enables extremely compact roll-up storage and instant semi-rigid deployment. Available in 9.8ft/3m and 16.4ft/5m lengths, the pole's hook interface enables intentional hook clocking and placement for one/two story windows and multi-pitch climbs with a REBS Wire Ladder.

CAPABILITIES AND SPECIFICATIONS

PN: WP-15.0M-WB

Brand: REBS

Material Construction: Carbon Fiber

Weight: 34.8 lbs / 15.8 kg

Typical Reach Height: 49 ft / 15 m

RECOMMENDED MISSION PROFILES

VBSS: Surface, Subsurface

Dive Operations: Boarding, Ladders

Rescue: Swift Water/Flood, Disaster Response, Maritime

Urban: Hook and Climb, RECCE/SNOT, EOD, Industrial

Mountain: Adobe/Softwall
